# Sharpening machine *RS-75* & *RS-150 Duo*

Your specialist in sharpening technology

## Sharpening

The optimum sharpening angle is already set on the machine. The knife is quickly resharpened by passing the blade through the sharpening wheels. The low rotation speed and the material of the sharpening wheels ensures that the knife blade does not heat up during the sharpening process.

## Honing

The knife will be drawn through the honing wheels. The honing wheels produce a smooth edge, hence a high edge retention is guaranteed. The knife will stay sharp over a longer period of time, before the next grinding process is necessary.

Your advantages are:

- Increased productivity
- Reduced knife and sharpening cost
- Good performance on the cut product
- Diminished risk of work injuries during sharpening process
- Contentment of employees and customers

Technical Data:

**RS-75**  
Depth 230 mm  
Width 160 mm  
Height 160 mm  
Weight 5,1 kg

1~240 Volt – 50/60 Hz.  
1~115 Volt – 50/60 Hz.

CE/GS

**RS-150 Duo**  
Depth 230 mm  
Width 330 mm  
Height 160 mm  
Weight 7,2 kg

1~240 Volt – 50/60 Hz.  
1~115 Volt – 50/60 Hz.

CE/GS
